

Note to UNM Biology Students

University of Montana transcripts will document that you took my Summer Session 2020 FLBS courses.

Nevertheless, if you take my 5-credit, 4-week class at FLBS, ***you will earn UNM Biology degree credit*** for taking the UNM Biology Department's Animal Behavior course (BIOL 455; 3-credits), plus an additional 2-credits in UNM's BIOL 402.

If you opt to take the entire 7-credit, 6-week base course and course extension package, then that will earn you an additional 2-credits in UNM's BIOL 402.

My FLBS course is complimentary to BIOL 455 at UNM. If you have taken Animal Behavior 455 at UNM, you will NOT receive additional UNM credit for 455 by taking my FLBS field course. However, the additional experience from the FLBS course will still be useful to you intellectually and in your graduate school applications.

We will work out custom credit-transfer arrangements for UNM non-Biology majors who elect to take my FLBS courses.
